

Best Practice Prescribing

MAR review

	When entering a new order, it is essential best practice to ensure the intended order has transferred safely to the MAR, which is the nurses view from where they administer medications
	Following your order in OM being confirmed, you must navigate to MAR
	You can access MAR view from the Menu button, followed by edit MAR

You can review the intended order, correct transmission to the MAR, and review other prescriptions for this patient.

Click on the green icon to alphabetise the view of medications
