## Intake and Output Interpretation

The screenshot shows the PCS Chart interface with a top navigation bar containing icons for Return To, Home, Chart, Document, Orders, Discharge, Sign, and Workload. Below the navigation bar are several tabs: Diagnostics, History & Problems, Summary, Provider Notes, Administrative, Activity, Nurse/Allied Health, Other Clinical, Flow sheets, Medications, Workload Items, and Health Mgmt. The Summary tab is selected, and a red box highlights the 'Summary' widget. Below the widget, there is a section for 'Widget data for 05/11/25 (ADM IN)' and a link to 'I & O 24 Hour Summary'.

Patient’s intake and output can be viewed in detail on the chart using the Intake and Output Widget. Labelled ‘**I & O 24 Hour Summary**’ This widget can be found on your patient’s Summary

The screenshot shows the 'I & O 24 Hour Summary' widget. The title is 'Summary' with an upward arrow icon. Below the title is a section for 'Widget data for 18/09/25 (ADM IN)'. The widget is expanded to show the 'I & O 24 Hour Summary' link. The data is for the period '23/09/25 11:47 - 24/09/25 11:47'. The data is presented in a table format with a vertical scrollbar on the right.

### The system resets at 08:00 each day.

When viewing hourly and you update the 09:00 output, it also updates the 08:00 entry to reflect the cumulative total for the current 24-hour period.

For example: At 08:00, the value might show **400/400**. After the 09:00 update, the 08:00 entry changes to **400/800**, and this pattern continues for the rest of that 24-hour period.

On paper it would have looked:

08:00 400/400  
09:00 400/800  
10:00 200/1000
