Indications

1. All **Adult** Medical and Surgical patients & **Paediatric**
    - Inpatients and day-case patients over *16* years old
    - At admission,
    - Within 24 hours post admission
    - At least every 7 days thereafter

2. All **Pregnant** patients, from conception to 6 weeks post delivery
    - At admission
    - Within 6 hours post-delivery if admitted for labour

3. **Day Case** patients
    - A VTE risk assessment should be completed where the consultant deems it clinically necessary, taking into account the patient's individual risk of VTE.
    - All day case patients who remain in hospital overnight must undergo a VTE risk assessment once the decision to admit overnight has been made.
